Engaging a company's workforce into the fabric of the organisation has never been more relevant. The political and economic uncertainty presents opportunities for business to explore alternative strategies and solutions to ensure longevity and success. Now backed by significant tax breaks and wide political support, employee ownership is an attractive and viable structure for business owners to consider.

Join some of the leading figures in employee ownership to discuss:

- the [Ownership Effect Report](#), due to be published in the New Year;
- the employee-owned model and available tax breaks;
- transitioning to employee ownership and financing options; and
- engaging with your staff to ensure a successful transition.
